UNCLE SAM is a ware novice in the business of keeping his soldiers free from sickness while campaigning in tropical climates, but there are others. Of the 110,000 more or less acclimated Spanish troops in Cuba 20,000 are in the hospitals.

Some of the one horse Democratic papers are claiming that their party will control the next House of Representatives. When it is known that to do this there must be a clear gain of fifty-four members the outlook is about as promising as a snowstorm in July.

THE late GROVER CLEVELAND is opposed to Uncle Sam reaching out into the world. His Administration always was opposed to American enterprise, for he tried to curb it with Free-trade poison. He was also opposed to the spread of the American form of Government, for he ordered MIST BROWN, "my Paramount Commissioner," to haul down the American Flag in Hawaii.

A MATSVILLE Preacher announced that he would discuss a family scandal from his pulpit, and as a result every seat in the Church was filled long before the time for Church service, many standing in the aisles and a look of satisfaction was on the faces of all present. The shrewd manner of the flock then proceeded to discuss on Adam and Eve and the serpent.—Exchange.

All of which is a baldheaded lie.

WILL THE PEOPLE

SUBMIT?

Following are the not results of the infamous Grover Election Commission: Democrats absolutely control the election system in every county in Kentucky. In 10 counties there are two Democratic and one Republican Election Commissioner; in 13 other counties there are two Democratic and one Populist Commissioner; and in the 11 remaining counties we have solidly Democratic Boards.

Republicans are in a helpless minority of one against two in 36 counties, and in 24 counties they are absolutely without representation on the Boards that are masters of the election machinery, pass upon all election contests and from whose most infamous decisions there is no appeal.

The Republican organizations were not permitted to select the few Republicans appointed, and it is a notorious fact that the so-called Populists are nearly all Democrats in disguise, having voted and acted with the Democratic party on every important occasion in recent years.

The mask of hypocrisy that was put on when Judge PAVOR was elected a member of the State Election Commission has been thrown off, and the double conspiracy is revealed in all its hideousness.

Has the Republican party been such an enemy to the state and Nation as to justify these outrageous laws and decrees to drive or keep it from power?

Is the supremacy of WILLIAM GOODE, and his high-handed followers so important to the welfare of Kentucky as to condone this unseemly rape of the ballot?

Will the people submit?

The Health of the Hair

is indicated by its condition. When the natural secretions decrease, when the hair becomes dry, splits at the ends and comes out in clumps, when the glossy disappearance and the hair becomes gray or faded, the ill health of the hair is indicated. The success of AYER'S HAIR VIGOR is due to the fact that it restores the hair-producing organs to their natural vigor. It encourages and promotes the secretions of the hair follicles, and thus gray or faded hair regains its original color, new growth begins, and lost lustre is restored.

"I have used Ayer's Hair Vigor for fifteen years. It causes the hair to keep natural color, and it keeps the scalp cool and healthy. It is the best hair medicine I have ever used."—Wm. Davis, Weymouth, Mass.

WHAT "JOHNNIES" ATE

Rations of a Confederate Soldier During the Civil War.

CONTRAST THE FOOD OF TODAY.

As nearly everything else has been written up fully in regard to hardships that occurred during the Spanish and American soldiers, says The Murfreesboro Banner, the ration question is now being brought forward, and general complaint seems to have prevailed everywhere, from Santiago to San Francisco, but so far we have never seen an itemized report of the kind of rations or the amount issued to each soldier, and every one is left in doubt about the matter.

It is well known that the soldiers in the Confederate Army seldom complained of their rations in public, never in print, as it was taken for granted that their Government was doing the best it could. Occasionally it was a feast when a Federal supply train was captured, and there was a slight change made on a successful foraging by taking haversacks from dead Federal soldiers.

After the first year of the war the daily rations of a Confederate soldier, when fighting or marching, were one pint of corn meal, one fourth pound of bacon. If coming in, in addition to this he drew one-fourth pound sugar, or one-half pint of molasses, three-fourths of a pound of black beans, one ounce of oatmeal and one-eighth of a pound of soap, and on Christmas Day a "jigger" of pistol whisky.

It is well known that General E. Kirby Smith invaded Kentucky in 1862, they had ten days rations issued to them and started off over the mountains to get in rear of Cumberland Gap, leaving their wagon and supply train at the Creek Gap. At the end of the sixth day there was not six pounds of rations in the whole division. General Smith, to supply the men with something to eat, bought whole hells of corn, which was in the roasting ear stage, and the soldiers were told to help themselves. As the soldiers had no cooking vessels, they built fires and attempted to roast it, the result being that it was burned black on the outside and raw on the inside.

It was while this siege was going on Private James Smith of this city remarked to the Chaplain of General Cleburne that he had just had a splendid breakfast. Upon being asked by General Cleburne where he got his breakfast and what it consisted of, he replied very promptly that it consisted of three cents of buckwheat and a piece of corn.

If the soldier at Santiago or any camp thinks he is living on short rations, let him compare with the hardest rations of the Confederate soldiers, and he will see that he is being treated, if not fed on the fat of the land.

Great pains is taken with our Coke to make it retain its heat and give a hot, clean fire. It is not a residue. Get our price on the corner.

UNUSUAL CASE.

John Gray and Katie Larcor married on a License Which Had Been Issued to Them Eight Years Ago.

FRANKFORT, Ky., Oct. 7.—County Attorney Polakof, of this county, was called on Thursday for an opinion in a rather unusual case involving the happiness of a couple from the country, who were anxious to get married quickly, the groom, especially so, as he feared that the prospective bride might change her mind. The parties to the wedding, which occurred shortly after the rendition of the opinion, were John Gray and Katie Larcor. They had been sweethearts since 1890, and the trouble arose over the attempt to get married on a license secured by Gray in 1890, but never used. The minister wouldn't perform the ceremony, and Gray appealed to the county attorney. He said that he had purchased the license in the spring of 1890, the groom of Miss Larcor to marry him, but that she changed her mind before the ceremony was performed. He returned the license to the county clerk but did not give up hope of finally having an opportunity to use it. He continued to display his affection for the woman in question until she finally agreed to marry him. County Attorney Polakof decided that the license was still good, and the couple were married immediately.
